

unpleasant odour in the passenger compartment

05/05/2022

Regular use of the air conditioner can cause unpleasant odours in the passenger compartment to build up over time. Plus if the occupants smoke, this bouquet of unpleasant odours will be supplemented with a persistent tobacco smell. This odour comes from the interaction of moisture and warm temperature causing the appearance of moulds and bacteria.

BIZOL AC Clean+ c30

- eliminates stale and unpleasant odours
- forms a protective film on the evaporator and air ducts
- leave a pleasant orange smell
- for car and home air conditioners
