

engine starting problems

05/05/2022

Low-quality diesel fuel causes formation of engine deposits on fuel injectors and within the injector rail thus hindering proper fuel feeding and impairing quality of its atomisation.

BIZOL Diesel System Clean+ d60

- removes combustion residues and soot deposit on fuel injectors and in the combustion chamber
- solves problems with engine starting
- provides running evenness
- provides excellent protection of the entire fuel system against corrosion
- improves lubricating properties of diesel fuel
- improves the diesel fuel cetane number
